Response to Arguments

Applicant's arguments, see remarks pages 2-7, filed 02/28/05, with respect to rejection of claims 1-26 have been fully considered and are persuasive. The rejection of 11/29/04 has been withdrawn.

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: Claims 1-2, 17 and 26 are allowable because the prior art of record fails to disclose stirring fan assembly mounted in the fresh food compartment for developing a re-circulating airflow within the fresh food compartment; (See claims 1-2, 17 and 26); control unit for operating the stirring fan whenever the cooling system is de-activated and the damper is in closed position to create a substantially uniform temperature within the fresh food compartment (See claims 1 and 17); a filter pad arranged between the fan cover and the stirring fan, the stirring fan assembly including a central portion through which a re-circulating air is drawn, and a peripheral portion for redirecting the re-circulating airflow back to the fresh food compartment (See claims 1, 2 and 17); directing the flow of re-circulating air through a filter pad of the stirring fan assembly to remove odors and other contaminants from the flow of re-circulating air; and redirecting the flow of re-circulating air, through a peripheral portion of the stirring fan assembly, into the fresh food compartment in a plurality of directions to minimize temperature stratification within the fresh food compartment (See Claim 26).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
